## Helping Companies Confront the Regulatory and Business Challenges They Face Today

We provide our clients with unparalleled customer service and cost-controlled solutions utilizing sound and proven e-Discovery and Digital Forensic advanced technologies to manage, find and cull electronically stored information (ESI).

### Digital/Computer Forensics

- Recover email data
- Preserve evidence with chain of custody that ensures evidentiary integrity and mirror imaging technology
- Recover deleted data files and/or fragments
- Recreate time-critical computer events
- Recover data due to hardware or software malfunctions or destruction
- Access password-protected or encrypted files
- 24/7 incident response

### e-Discovery

- Collect, cull and preserve electronically stored evidence
- Insure every document produced or not produced is defensible
- Maintain chain of custody that ensures evidentiary integrity

### Electronic Litigation Support

- Collect and manage ESI for litigation in compliance with industry best practices and Federal Rules of Civil Procedure (FRCP)
- Document ESI retention, storage and chain of custody in compliance with FRCP

### e-Discovery Project Management

We provide a project manager who will direct the e-Discovery process of your litigation event. The cost of conducting e-Discovery can be excessive. Our project manager can identify and reduce the costs and maintain the focus and timelines required to be compliant.

- On-site, full-time, certified and experienced project manager
- EDRM (Electronic Discovery Reference Model)
- Industry proven forensic tools
- Cost control solutions

*Our digital forensic examiners, advisors and project managers are CFCE, CISM, SCERS, CIFI, EnCE, CISSP, Cell and PDA Certified with witness/expert witness testimony experience.*
